

INDUSTRIAL EXCRUTION

INDUSTRIAL VISIT

We organize industrial visits to provide students with practical exposure, bridging the gap between theoretical knowledge and real-world Pharmaceutical operations. These visits will continue to offer students hands-on experience, opportunities to interact with industry professionals, and insights into the latest advancements in Pharmaceutical technologies, production, quality control, and will continue to do so in the future.

The visit to Micro Labs Limited, provided students with valuable insights into potential career paths in the Pharmaceutical Industry.

The visit gave knowledge about the strict guidelines and regulations followed to maintain the highest standards in production.

Students gained valuable knowledge about Micro Labs' role in producing high-quality Pharmaceuticals.

ACG is a leader in incorporating robotics and automation into its manufacturing and packaging processes.

ACG Industry Visit – Dahanu: The visit to ACG Industry in Dahanu further expanded students' knowledge about the latest technologies used in Pharmaceutical manufacturing.

Students interacted with industry experts and gained insights into how innovation and precision drive success in the Pharmaceutical field.

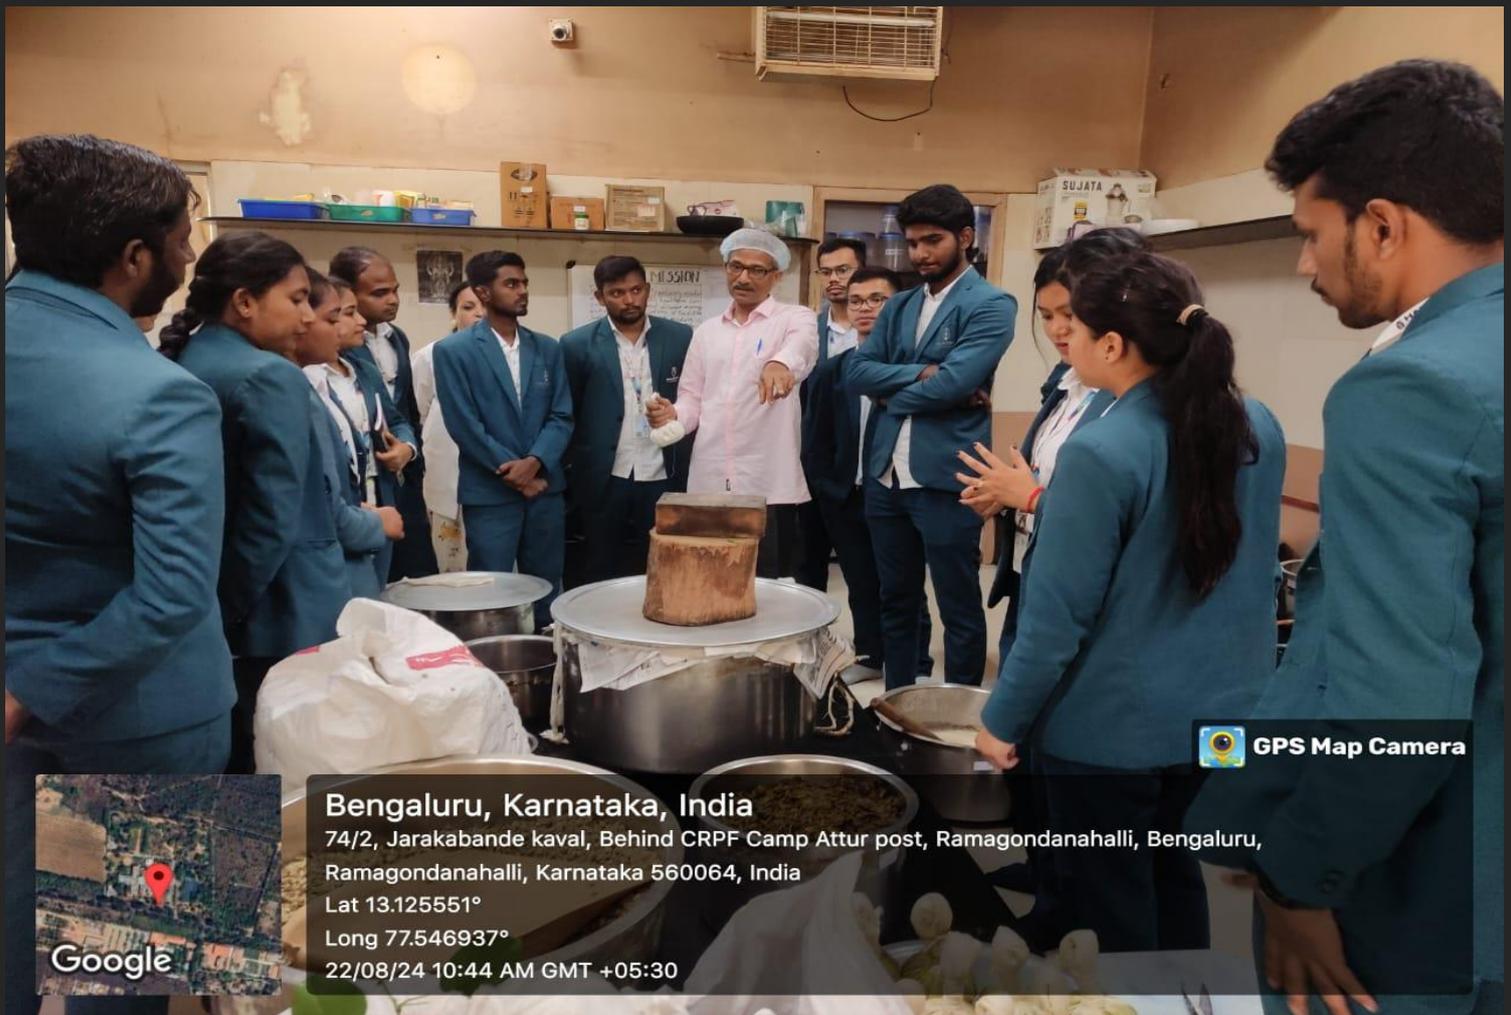

ACG Industry Visit – Satara: Our students recently visited ACG Industry in Satara, where they got an exclusive look into the advanced manufacturing processes used in the Pharmaceutical sector.

The tour allowed students to understand the intricate details of production lines and quality control procedures essential in the industry.

The visit provided students with an overview of TDU's state-of-the-art laboratories and research facilities.

Experts from the TDU lead students through various technical processes and systems in the unit.
